

## **Subpart H—General Provisions for In-Use Emission Regulations for 1994 and Later Model Year Light-Duty Vehicles and Light-Duty Trucks**

SOURCE: 56 FR 25781, June 5, 1991, unless otherwise noted.

### **§ 86.701-94 General applicability.**

(a) The provisions of this subpart apply to: 1994 and later model year Otto-cycle and diesel light-duty vehicles; 1994 and later model year Otto-cycle and diesel light-duty trucks; and 1994 and later model year Otto-cycle and diesel heavy-duty engines. The provisions of subpart B of this part apply to this subpart.

(b) References in this subpart to engine families and emission control systems shall be deemed to refer to durability groups and test groups as applicable for manufacturers certifying new light-duty vehicles and light-duty trucks under the provisions of subpart S of this part.

[64 FR 23922, May 4, 1999]

### **§ 86.702-94 Definitions.**

The definitions in subparts A and B of this part apply to this subpart.

### **§ 86.703-94 Abbreviations.**

The abbreviations in subparts A and B of this part apply to this subpart.

### **§ 86.704-94 Section numbering; construction.**

Section § 86.104 of subpart B applies to this subpart.

### **§§ 86.705-94—86.707-94 [Reserved]**

### **§ 86.708-94 In-use emission standards for 1994 and later model year light-duty vehicles.**

Section 86.708-94 includes text that specifies requirements that differ from § 86.090-8 of subpart A of this part. Where a paragraph in § 86.090-8 is identical and applicable to § 86.708-94, this may be indicated by specifying the corresponding paragraph and the statement “[Reserved].” For guidance see § 86.090-8.” Where a corresponding para-

graph of § 86.090-8 is not applicable, this is indicated by the statement “[Reserved].”

(a)(1) *Standards.* (i) In-use exhaust emissions from 1994 and later model year light-duty vehicles shall meet all standards in tables H94-3 and H94-4 in the rows designated with the applicable fuel type, according to the implementation schedules in tables H94-1 and H94-2, and shall meet all standards in tables H94-6 and H94-7 in the rows designated with the applicable fuel type, according to the implementation schedules in table H94-5, as follows:

(A)(i) For model years 1994 and 1995, a minimum of the percentage shown in table H94-1 of a manufacturer's sales of the applicable model year's light-duty vehicles shall not exceed the applicable Tier 1<sub>1</sub> standards in table H94-3. The remaining vehicles, if any, shall not exceed the applicable Tier 0 standards in table H94-3.

(ii) For model years 1996 and beyond, a minimum of the percentages shown in table H94-2 of a manufacturer's sales of the applicable model year's light-duty vehicles shall not exceed the applicable Tier 1 standards in tables H94-3 and H94-4. The remaining vehicles, if any, shall not exceed the applicable Tier 1<sub>1</sub> standards in table H94-3.

(2) *Particulates.* For in-use exhaust emissions for model years 1994 and later, a minimum of the percentage shown in table H94-5 of a manufacturer's sales of the applicable model year's light-duty vehicles shall not exceed the applicable Tier 1 standards in tables H94-6 and H94-7. The remaining vehicles, if any, shall not exceed the applicable Tier 0 standards in table H94-6.

(3) Optionally, compliance with the Tier 1<sub>1</sub> and Tier 1 implementation schedules of this section may be based on the combined sales of light-duty vehicles and light-duty trucks, if such option was taken for certification as allowed in § 86.094-8 and § 86.094-9 of subpart A of this part. Vehicles meeting Tier 1<sub>1</sub> in-use standards shall only be combined for this purpose with other vehicles meeting Tier 1<sub>1</sub> standards, and those meeting Tier 1 standards shall only be combined with those meeting the Tier 1 standards.

<sup>1</sup>The applicable useful life is 10 years or 100,000 miles, whichever first occurs, except that no enforcement testing will be done beyond 7 years or 75,000 miles, whichever first occurs.

(B)(1)(i) Sales percentages for the purposes of determining compliance with paragraph (a)(1)(i) of this section shall be based on total actual U.S. sales of light-duty vehicles of the applicable model year by a manufacturer to a dealer, distributor, fleet operator, broker, or any other entity which comprises the point of first sale. If the option of paragraph (a)(1)(i)(A)(3) is taken, such sales percentages shall be based on the total actual combined U.S. sales of light-duty vehicles and light light-duty trucks of the applicable model year by a manufacturer to a dealer, distributor, fleet operator, broker, or any other entity which comprises the point of first sale.

(ii) The manufacturer may petition the Administrator to allow actual volume produced for U.S. sales to be used in lieu of actual U.S. sales for purposes of determining compliance with the implementation schedule sales percentages of tables H94–1, H94–2 and H94–5 of this section. Such petition shall be submitted within 30 days of the end of the model year to the Manufacturers Operations Division. For the petition to be granted, the manufacturer must estab-

lish to the satisfaction of the Administrator that actual production volume is functionally equivalent to actual sales volume.

(iii) The vehicles that are counted toward the implementation schedule sales percentage, or toward the total on which such percentage is based, for certification purposes as prescribed by § 86.094–8 (a)(1)(i)(B)(1)(iii) of subpart A of this part, shall be the same vehicles that are counted toward the implementation schedule sales percentage, or the total on which it is based, for in-use purposes.

(iv) Small volume manufacturers, as defined in § 86.092–14 (b) (1) and (2), are exempt from the implementation schedules of tables H94–1 and H94–2 of this section for model years 1994 through 1997, and from the implementation schedule of table H94–5 of this section for model years 1994 and 1995. For small volume manufacturers, Tier 0 standards of table H94–6 continue to apply until model year 1996 and Tier 0 standards of table H94–3 continue to apply until model year 1998, when one hundred percent compliance with the Tier 1 standards of tables H94–3, H94–4,

## § 86.708-98

## 40 CFR Ch. I (7-1-99 Edition)

H94-6, and H94-7 is required. This exemption does not apply to small volume engine families as defined in § 86.092-14 (b)(5).

(2)(i) For 1994 and 1995 model year light-duty vehicles, the engine families which comprise the required implementation schedule percentage of sales meeting Tier 1 standards for HC<sub>s</sub>, CO, and NO<sub>x</sub>, for purposes of certification, shall be the same engine families which comprise the required implementation schedule percentage of sales meeting the interim in-use standards (labeled "Tier 1<sub>i</sub>" in the tables of in-use standards) for in-use purposes.

(ii) For 1996 and 1997 model year light-duty vehicles the engine families which comprise the required implementation schedule percentage of sales meeting interim in-use standards (labeled "Tier 1<sub>i</sub>" in the tables of in-use standards) and final in-use standards (labeled "Tier 1" in the tables of in-use standards) respectively, for HC<sub>s</sub>, CO, and NO<sub>x</sub>, for in-use purposes, shall be designated by the manufacturer at the time of Application for Certification.

(iii) For 1994 and 1995 model year light-duty vehicles, the engine families which comprise the required implementation schedule percentage of sales meeting Tier 1 standards, for PM, for purposes of certification, shall be the same engine families which comprise the required implementation schedule percentage of sales meeting the final in-use standards (labeled "Tier 1" in the tables of in-use standards) for PM for in-use purposes.

(3) The manufacturer must state at the time of Application for Certification, based on projected U.S. sales or projected production for U.S. sale, which families will be used to attain the required implementation schedule sales percentages for in-use purposes.

(4) A manufacturer cannot use one set of engine families to meet its in-use intermediate useful life standards and another to meet its in-use full useful life standards. The same families which are used to meet the intermediate useful life standards will be required without deviation to meet the corresponding full useful life standards.

(ii) Engine families participating in the particulate averaging program as specified in § 86.094-8 (a)(1)(ii) shall be

subject, for purposes of in-use compliance, to the particulate family emission limit determined for that engine family for certification purposes, in lieu of the appropriate particulate standard shown in the tables of in-use standards in this section.

(iii) CST emissions from model year 1996 and later gasoline-fueled Otto-cycle light-duty vehicles measured and calculated in accordance with subpart O of this part may not exceed the standards listed in paragraphs (a)(1)(iii) (A) and (B) of this section.

(A) Hydrocarbons: 220 ppm as hexane.  
(B) Carbon monoxide: 1.2 percent.

(2) The standards set forth in paragraph (a)(1)(i) of this section refer to the exhaust emitted over a driving schedule as set forth in subpart B of this part and measured and calculated in accordance with those procedures. The test weight basis for light-duty vehicles, for the purposes of determining equivalent test weight as prescribed in § 86.129-94, shall be loaded vehicle weight.

(3) The standards set forth in paragraph (a)(1)(iii) of this section refer to the exhaust emitted during the CST as set forth in subpart O of this part and measured and calculated in accordance with those provisions.

(b) The provisions of § 86.090-8(b) through (h) of subpart A of this part apply to this section. The provisions of § 86.096-8(i) through (k) of subpart A of this part apply to this section.

[56 FR 25781, June 5, 1991, as amended at 57 FR 31922, July 17, 1992; 58 FR 33211, June 16, 1993; 58 FR 58424, Nov. 1, 1993; 59 FR 33913, July 1, 1994; 59 FR 48515, Sept. 21, 1994]

### § 86.708-98 In-use emission standards for 1998 and later model year light-duty vehicles.

Section 86.708-98 includes text that specifies requirements that differ from § 86.090-8 of subpart A of this part. Where a paragraph in § 86.090-8 is identical and applicable to § 86.708-98, this may be indicated by specifying the corresponding paragraph and the statement "[Reserved]. For guidance see § 86.090-8." Where a corresponding paragraph of § 86.090-8 is not applicable, this is indicated by the statement "[Reserved]."

## Environmental Protection Agency, EPA

**§ 86.709-94**

(a)(1)(i) In-use exhaust emissions from 1998 and later model year light-duty vehicles shall meet all standards

in tables H98-1 and H98-2 in the rows designated with the applicable fuel type.

TABLE H98-1—INTERMEDIATE USEFUL LIFE<sup>1</sup> STANDARDS (G/MI) FOR LIGHT-DUTY VEHICLES

Fuel	THC	NMHC	THCE	NMHCE	CO	NO <sub>x</sub>	PM
Gasoline .....	0.41	0.25	.....	.....	3.4	0.4	0.08
Diesel .....	0.41	0.25	.....	.....	3.4	1.0	0.08
Methanol .....	.....	.....	0.41	0.25	3.4	0.4	0.08
Natural Gas .....	.....	0.25	.....	.....	3.4	0.4	0.08
LPG .....	0.41	0.25	.....	.....	3.4	0.4	0.08

<sup>1</sup>The applicable useful life is 5 years or 50,000 miles, whichever first occurs.

TABLE H98-2—FULL USEFUL LIFE<sup>1</sup> STANDARDS (G/MI) FOR LIGHT-DUTY VEHICLES

Fuel	THC	NMHC	THCE	NMHCE	CO	NO <sub>x</sub>	PM
Gasoline .....	.....	0.31	.....	.....	4.2	0.6	0.10
Diesel .....	.....	0.31	.....	.....	4.2	1.25	0.10
Methanol .....	.....	.....	.....	0.31	4.2	0.6	0.10
Natural Gas .....	.....	0.31	.....	.....	4.2	0.6	0.10
LPG .....	.....	0.31	.....	.....	4.2	0.6	0.10

<sup>1</sup>The applicable useful life is 10 years or 100,000 miles, whichever first occurs, except that no enforcement testing will be done beyond 7 years or 75,000 miles, whichever first occurs.

(ii)(A) Vehicles subject to the standards of paragraph (a)(1)(i) of this section shall be all actual U.S. sales of light-duty vehicles of the applicable model year by a manufacturer.

(B) A manufacturer cannot use one set of engine families to meet its in-use intermediate useful life standards and another to meet its in-use full useful life standards. The same families which are used to meet the intermediate useful life standards will be required without deviation to meet the corresponding full useful life standards.

(iii) CST emissions from gasoline-fueled Otto-cycle light-duty vehicles measured and calculated in accordance with subpart O of this part may not exceed the standards listed in paragraphs (a)(1)(iii) (A) and (B) of this section.

- (A) Hydrocarbons: 220 ppm as hexane.
- (B) Carbon monoxide: 1.2 percent.

(2) The standards set forth in paragraph (a)(1) of this section refer to the exhaust emitted over a driving schedule as set forth in subpart B of this part and measured and calculated in accordance with those procedures. The test weight basis for light-duty vehicles, for the purposes of determining equivalent test weight as prescribed in § 86.129-94, shall be loaded vehicle weight.

(3) The standards set forth in paragraph (a)(1)(iii) of this section refer to

the exhaust emitted during the CST as set forth in subpart O of this part and measured and calculated in accordance with those provisions.

(b) The provisions of § 86.090-8 (b) through (h) of subpart A of this part apply to this section. The provisions of § 86.096-8 (i) through (j) of subpart A of this part apply to this section.

[56 FR 25781, June 5, 1991, as amended at 58 FR 58424, Nov. 1, 1993; 59 FR 33913, July 1, 1994; 59 FR 48516, Sept. 21, 1994]

#### **§ 86.709-94 In-use emission standards for 1994 and later model year light-duty trucks.**

Section 86.709-94 includes text that specifies requirements that differ from § 86.091-9 of subpart A of this part. Where a paragraph in § 86.091-9 is identical and applicable to § 86.709-94, this may be indicated by specifying the corresponding paragraph and the statement “[Reserved]. For guidance see § 86.091-9.” Where a corresponding paragraph of § 86.091-9 is not applicable, this is indicated by the statement “[Reserved].”

(a)(1) *Standards*—(i) *Light light-duty trucks*. In-use exhaust emissions from 1994 and later model year light light-duty trucks shall meet all standards in tables H94-9 and H94-10 in the rows designated with the applicable fuel type and loaded vehicle weight, according to

**§ 86.709–94**

**40 CFR Ch. I (7-1-99 Edition)**

the implementation schedule in table H94–8, and shall meet all standards in tables H94–12 and H94–13 in the rows designated with the applicable fuel type and loaded vehicle weight, according to the implementation schedules in table H94–11, as follows:

(A)(1)(i) For model year 1994 and 1995, a minimum of the respective percentages shown in the Tier 1<sub>I</sub> column of table H94–8 of a manufacturer's sales of the applicable model year's light light-duty trucks shall not exceed the applicable Tier 1<sub>I</sub> standards in tables H94–9 and H94–10. The remaining vehicles, if any, shall not exceed the applicable Tier 0 standards in tables H94–9 and H94–10.

(ii) For model years 1996 and 1997, a minimum of the percentages shown in the Tier 1 percentage column of table H94–8 of a manufacturer's sales of the applicable model year's light light-duty trucks shall not exceed the applicable Tier 1 standards in table H94–9 and H94–10, and the remaining vehicles, if any, shall not exceed the applicable Tier 1<sub>I</sub> standards in tables H94–9 and H94–10.

(iii) For model year 1998 and beyond, a minimum of the percentage shown in

the Tier 1 percentage column of table H94–8 of a manufacturer's sales of the applicable model year's light light-duty trucks shall not exceed the applicable Tier 1 standards in tables H94–9 and H94–10.

(2) *Particulates.* For in-use exhaust emissions for 1994 and later, a minimum of the percentage shown in table H94–11 of a manufacturer's sales of the applicable model year's light light-duty trucks shall not exceed the applicable Tier 1 standards in tables H94–12 and H94–13. The remaining light light-duty trucks, if any, shall not exceed the applicable Tier 0 standards in tables H94–12 and H94–13.

(3) Optionally, compliance with the Tier 1<sub>I</sub> and Tier 1 implementation schedules of this section may be based on the combined sales of light-duty vehicles and light light-duty trucks, if such option was taken for certification as allowed in § 86.094–8 and § 86.094–9 of subpart A of this part. Vehicles meeting Tier 1<sub>I</sub> in-use standards shall only be combined for this purpose with other vehicles meeting Tier 1<sub>I</sub> standards, and those meeting Tier 1 standards shall only be combined with those meeting the Tier 1 standards.

<sup>1</sup>The applicable useful life is 10 years or 100,000 miles, whichever first occurs, except that no enforcement testing will be done beyond 7 years or 75,000 miles, whichever first occurs.

<sup>2</sup>Applicable only to diesel-cycle vehicles.

(B)(1)(i) Sales percentages for the purposes of determining compliance with paragraph (a)(1)(i)(A) of this section shall be based on total actual U.S. sales of light-duty vehicles of the applicable model year by a manufacturer to a dealer, distributor, fleet operator, broker, or any other entity which comprises the point of first sale. If the option of paragraph (a)(1)(i)(A)(3) is taken, such sales percentages shall be based on the total actual combined U.S. sales of light-duty vehicles and light light-duty trucks of the applicable model year by a manufacturer to a dealer, distributor, fleet operator, broker, or any other entity which comprises the point of first sale.

(ii) The manufacturer may petition the Administrator to allow actual vol-

ume produced for U.S. sale to be used in lieu of actual U.S. sales for purposes of determining compliance with the implementation schedule sales percentages of tables H94-8 and H94-11 of this section. Such petition shall be submitted within 30 days of the end of the model year to the Manufacturers Operations Division. For the petition to be granted, the manufacturer must establish to the satisfaction of the Administrator that actual production volume is functionally equivalent to actual sales volume.

(iii) The vehicles that are counted toward the implementation schedule sales percentage, or toward the total on which such percentage is based, for certification purposes as prescribed by § 86.094-9(a)(1)(i)(B)(1)(iii) of subpart A

of this part, shall be the same vehicles that are counted toward the implementation schedule sales percentage, or the total on which it is based, for in-use purposes.

(iv) Small volume manufacturers, as defined in § 86.092-14(b) (1) and (2), are exempt from the implementation schedules of table H94-8 of this section for model years 1994 through 1997 and from the implementation schedules of table H94-11 of this section for model years 1995 and 1996. For small volume manufacturers, Tier 0 standards of tables H94-9 and H94-10 continue to apply until model year 1998 and the Tier 0 standards of tables H94-12 and H94-13 continue to apply until model year 1997, when one hundred percent compliance with the Tier 1 standards of such tables is required. This exemption does not apply to small volume engine families as defined in § 86.092-14 (b)(5).

(2)(i) For 1994 and 1995 model year light light-duty trucks, the engine families which comprise the required implementation schedule percentage of sales meeting Tier 1 standards for HC<sub>s</sub>, CO, and NO<sub>x</sub>, for purposes of certification, shall be the same engine families which comprise the required implementation schedule percentage of sales meeting the interim in-use standards (labeled "Tier 1<sub>I</sub>" in the tables of in-use standards) for in-use purposes.

(ii) For 1996 and 1997 model year light light-duty trucks, the engine families which comprise the required implementation schedule percentage of sales meeting interim in-use standards (labeled "Tier 1<sub>I</sub>" in the tables of in-use standards) and final in-use standards (labeled "Tier 1" in the tables of in-use standards) respectively, for HC<sub>s</sub>, CO, and NO<sub>x</sub>, for in-use purposes, shall be designated by the manufacturer at the time of certification.

(iii) For 1995 and 1996 model year light light-duty trucks, the engine families which comprise the required implementation schedule percentage of sales meeting Tier 1 standards, for PM, for purposes of certification, shall be the same engine families which comprise the required implementation schedule percentage of sales meeting the final in-use standards (labeled "Tier 1" in the tables of in-use standards) for PM for in-use purposes.

(3) The manufacturer must state at the time of Application for Certification, based on projected U.S. sales or projected production for U.S. sale, which families will be used to attain the required implementation schedule sales percentages for in-use purposes.

(4) A manufacturer can not use one set of engine families to meet its in-use intermediate useful life standards and another to meet its in-use full useful life standards. The same families which are used to meet the intermediate useful life standards will be required without deviation to meet the corresponding full useful life standards.

(ii) *Heavy light-duty trucks.* In-use exhaust emissions from 1994 and later model year heavy light-duty trucks shall meet all standards in tables H94-15 and H94-16 in the rows designated with the applicable fuel type and loaded vehicle weight or adjusted loaded vehicle weight, as applicable, according to the implementation schedule in table H94-14, and shall meet all standards in tables H94-18 and H94-19 in the rows designated with the applicable fuel type and loaded vehicle weight or adjusted loaded vehicle weight, as applicable, according to the implementation schedules in table H94-17, as follows:

(A)(I)(i) For model years 1994 through 1997, a minimum of the percentage shown in the Tier 1<sub>I</sub> column of table H94-14 of a manufacturer's sales of the applicable model year's heavy light-duty trucks shall not exceed the applicable Tier 1<sub>I</sub> standards in tables H94-15 and H94-16. The remaining vehicles, if any, shall not exceed the applicable Tier 0 standards in tables H94-15 and H94-16.

(ii) For model year 1998, a minimum of the percentage shown in table H94-14 of a manufacturer's sales of the applicable model year's heavy light-duty trucks shall not exceed the applicable Tier 1 standards in tables H94-15 and H94-16. The remaining vehicles shall not exceed the applicable Tier 1<sub>I</sub> standards in tables H94-15 and H94-16.

(iii) For model years 1999 and later, a minimum of the percentage shown in table H94-14 of a manufacturer's sales of the applicable model year's heavy light-duty trucks shall not exceed the

**§ 86.709–94**

**40 CFR Ch. I (7–1–99 Edition)**

applicable Tier 1 standards in tables H94–15 and H94–16.

(2) *Particulates.* For in-use exhaust emissions for model year 1994 and later, a minimum of the percentage shown in table H94–17 of a manufacturer's sales of the applicable model year's heavy

light-duty trucks shall not exceed the applicable Tier 1 standards in tables H94–18 and H94–19. The remaining heavy light-duty trucks, if any, shall not exceed the applicable Tier 0 standards in tables H94–18 and H94–19.

<sup>1</sup>The applicable useful life is 11 years or 120,000 miles, whichever first occurs, except that no enforcement testing will be done beyond 7 years or 90,000 miles, whichever first occurs.

(B)(1)(i) Sales percentages for the purposes of determining compliance with paragraph (a)(1)(ii)(A) of this section shall be based on total actual U.S. sales of light-duty vehicles of the applicable model year by a manufacturer to a dealer, distributor, fleet operator, broker, or any other entity which comprises the point of first sale.

(ii) The manufacturer may petition the Administrator to allow actual volume produced for U.S. sales to be used in lieu of actual U.S. sales for purposes of determining compliance with the implementation schedule sales percentages of tables H94-14 and H94-17 of this section. Such petition shall be submitted within 30 days of the end of the model year to the Manufacturers Operations Division. For the petition to be granted, the manufacturer must establish to the satisfaction of the Administrator that actual production volume is functionally equivalent to actual sales volume.

(iii) The vehicles that are counted toward the implementation schedule sales percentage, or toward the total on which such percentage is based, for certification purposes as prescribed by § 86.094-9(a)(1)(ii)(B)(1)(iii) of subpart A of this part, shall be the same vehicles that are counted toward the implementation schedule sales percentage, or the total on which it is based, for in-use purposes.

(iv) Small volume manufacturers, as defined in § 86.092-14(b) (1) and (2), are exempt from the implementation schedules of tables H94-14 of this section for model years 1996 through 1998 and from the implementation schedules of table H94-17 of this section for

model year 1996. For small volume manufacturers, Tier 0 standards of tables H94-15 and H94-16 continue to apply until model year 1999 and the Tier 0 standards of tables H94-18 and H94-19 continue to apply until model year 1997, when one hundred percent compliance with the Tier 1 standards of such tables is required. This exemption does not apply to small volume engine families as defined in § 86.092-14(b)(5).

(2)(i) For 1996 and 1997 model year heavy light-duty trucks, the engine families which comprise the required implementation schedule percentage of sales meeting Tier 1 standards for HC<sub>s</sub>, CO, and NO<sub>x</sub>, for purposes of certification, shall be the same engine families which comprise the required implementation schedule percentage of sales meeting the interim in-use standards (labeled "Tier 1<sub>i</sub>" in the tables of in-use standards) for in-use purposes.

(ii) For 1998 model year heavy light-duty trucks the engine families which comprise the required implementation schedule percentage of sales meeting interim in-use standards (labeled "Tier 1<sub>i</sub>" in the tables of in-use standards) and final in-use standards (labeled "Tier 1" in the tables of in-use standards) for HC<sub>s</sub>, CO, and NO<sub>x</sub>, for in-use purposes, shall be designated by the manufacturer at the time of certification.

(iii) For 1996 model year heavy light-duty trucks, the engine families which comprise the required implementation schedule percentage of sales meeting Tier 1 standards, for PM, for purposes

of certification, shall be the same engine families which comprise the required implementation schedule percentage of sales meeting the final in-use standards (labeled "Tier 1" in the tables of in-use standards) for PM for in-use purposes.

(3) The manufacturer must state at the time of Application for Certification, based on projected U.S. sales or projected production for U.S. sale, which families will be used to attain the required implementation schedule sales percentages.

(4) A manufacturer can not use one set of engine families to meet its in-use intermediate useful life standards and another to meet its in-use full useful life standards. The same families which are used to meet the intermediate useful life standards will be required without deviation to meet the corresponding full useful life standards.

(iii) Exhaust emissions of carbon monoxide from 1994 and later model year light-duty trucks shall not exceed 0.50 percent of exhaust gas flow at curb idle at a useful life of 11 years or 120,000 miles, whichever first occurs (for Otto-cycle and methanol-fueled diesel-cycle light-duty trucks only).

(iv)(A) Engine families participating in the applicable NO<sub>x</sub> averaging program as specified in § 86.094-9(a)(1)(iv)(A) shall be subject, for purposes of in-use compliance, to the NO<sub>x</sub> family emission limit determined for that engine family for certification purposes, in lieu of the appropriate NO<sub>x</sub> standard shown in the tables of in-use standards in this section.

(B) Engine families participating in the applicable particulate averaging program as specified in § 86.094-9(a)(1)(iv)(B) shall be subject, for purposes of in-use compliance, to the particulate family emission limit determined for that engine family for certification purposes, in lieu of the appropriate particulate standard shown in the tables of in-use standards in this section.

(v) CST emissions from model year 1996 and later gasoline-fueled Otto-cycle light-duty trucks measured and calculated in accordance with subpart O of this part may not exceed the standards listed in paragraphs (a)(1)(v)(A) and (B) of this section.

(A) Hydrocarbons: 220 ppm as hexane.  
(B) Carbon monoxide: 1.2 percent.

(2) The standards set forth in paragraphs (a)(1)(i) and (a)(1)(ii) of this section refer to the exhaust emitted over a driving schedule as set forth in subpart B of this part and measured and calculated in accordance with those procedures. The test weight basis for light light-duty trucks, and for heavy light-duty trucks certified to the Tier 0 standards of this section, for the purposes of determining equivalent test weight as prescribed in § 86.129-94, shall be loaded vehicle weight. The test weight basis for heavy light-duty trucks certified to the Tier 1 or Tier 1<sub>1</sub> standards of this section, for the purposes of determining equivalent test weight as prescribed in § 86.129-94, shall be adjusted loaded vehicle weight. The standard set forth in paragraph (a)(1)(iii) of this section refers to the exhaust emitted at curb idle and measured and calculated in accordance with the procedures set forth in subpart P of this part.

(3) The standards set forth in paragraph (a)(1)(v) of this section refer to the exhaust emitted during the CST as set forth in subpart O of this part and measured and calculated in accordance with those provisions.

(b) The provision of § 86.090-8(b) through (k) of subpart A of this part apply to this section.

[56 FR 25781, June 5, 1991, as amended at 57 FR 31922, July 17, 1992; 58 FR 33211, June 16, 1993; 58 FR 58424, Nov. 1, 1993; 59 FR 48516, Sept. 21, 1994]

**§ 86.709-99 In-use emission standards for 1999 and later model year light-duty trucks.**

Section 86.709-99 includes text that specifies requirements that differ from § 86.091-9 of subpart A of this part. Where a paragraph in § 86.091-9 is identical and applicable to § 86.709-99, this may be indicated by specifying the corresponding paragraph and the statement "[Reserved]. For guidance see § 86.091-9." Where a corresponding paragraph of § 86.091-9 is not applicable, this is indicated by the statement "[Reserved]."

(a)(1)(i)(A) *Light light-duty trucks.* In-use exhaust emissions from 1999 and later model year light light-duty

**§ 86.709–99**

**40 CFR Ch. I (7–1–99 Edition)**

trucks shall meet all standards in tables H99–1 and H99–2 in the rows designated with the applicable fuel type and loaded vehicle weight.

<sup>1</sup>The applicable useful life is 10 years or 100,000 miles, whichever first occurs, except that no enforcement testing will be done beyond 7 years or 75,000 miles, whichever first occurs.

<sup>2</sup>The applicable useful life is 11 years or 120,000 miles, whichever first occurs.

(B)(1) Vehicles subject to the standards of paragraph (a)(1)(i)(A) of this section shall be all actual U.S. sales of light light-duty trucks of the applicable model year by a manufacturer.

(2) A manufacturer can not use one set of engine families to meet its in-use intermediate useful life standards and another to meet its in-use full useful life standards. The same families which are used to meet the intermediate use-

ful life standards will be required without deviation to meet the corresponding full useful life standards.

(ii)(A) *Heavy light-duty trucks.* In-use exhaust emissions from 1999 and later model year heavy light-duty trucks shall meet all standards in tables H99–3 and H99–4 in the rows designated with the applicable fuel type and adjusted loaded vehicle weight.

**TABLE H99–3—INTERMEDIATE USEFUL LIFE<sup>1</sup> STANDARDS (G/MI) FOR HEAVY LIGHT-DUTY TRUCKS**

Diesel .....	>5750	0.80	0.56	.....	.....	7.3	1.53	0.12
Methanol .....	3751-5750	.....	.....	0.80	0.46	6.4	0.98	0.10
Methanol .....	>5750	.....	.....	0.80	0.56	7.3	1.53	0.12
Natural Gas .....	3751-5750	.....	0.46	.....	.....	6.4	0.98	0.10
Natural Gas .....	>5750	.....	0.56	.....	.....	7.3	1.53	0.12
LPG .....	3751-5750	0.80	0.46	.....	.....	6.4	0.98	0.10
LPG .....	>5750	0.80	0.56	.....	.....	7.3	1.53	0.12

<sup>1</sup>The applicable useful life is 11 years or 120,000 miles, whichever first occurs, except that no enforcement testing will be done beyond 7 years or 90,000 miles, whichever first occurs.

<sup>2</sup>The applicable useful life is 11 years or 120,000 miles, whichever first occurs.

(B)(1) Vehicles subject to the standards of paragraph (a)(1)(ii)(A) of this section shall be all actual U.S. sales of heavy light-duty trucks of the applicable model year by a manufacturer.

(2) A manufacturer can not use one set of engine families to meet its in-use intermediate useful life standards and another to meet its in-use full useful life standards. The same families which are used to meet the intermediate useful life standards will be required without deviation to meet the corresponding full useful life standards.

(iii) Exhaust emissions of carbon monoxide from 1999 and later model year light-duty trucks shall not exceed 0.50 percent of exhaust gas flow at curb idle at a useful life of 11 years or 120,000 miles, whichever first occurs (for Otto-cycle and methanol-fueled diesel-cycle light-duty trucks only).

(iv) CST emissions from gasoline-fueled Otto-cycle light-duty trucks measured and calculated in accordance with subpart O of this part may not exceed the standards listed in paragraphs (a)(1)(iv) (A) and (B) of this section.

(A) Hydrocarbons: 220 ppm as hexane.  
(B) Carbon monoxide: 1.2 percent.

(2) The standards set forth in paragraphs (a)(1)(i) and (a)(1)(ii) of this sec-

tion refer to the exhaust emitted over a driving schedule as set forth in subpart B of this part and measured and calculated in accordance with those procedures. The test weight basis for light light-duty trucks, for the purposes of determining equivalent test weight as prescribed in § 86.129-94, shall be loaded vehicle weight. The test weight basis for heavy light-duty trucks, for the purposes of determining equivalent test weight as prescribed in § 86.129-94, shall be adjusted loaded vehicle weight. The standard set forth in paragraph (a)(1)(iii) of this section refers to the exhaust emitted at curb idle and measured and calculated in accordance with the procedures set forth in subpart P of this part.

(3) The standards set forth in paragraph (a)(1)(iv) of this section refer to the exhaust emitted during the CST as set forth in subpart O of this part and measured and calculated in accordance with those provisions.

(b) The provisions of § 86.097-9(b), (c), and (g) through (k) of subpart A of this part apply to this section.
